	Gateway issues	
	PAN&Adhaar Verification on Staging	
	error 403	
	error 500	
	db entry	
	bug fixing on code level	
	staging down	
	error 405	
	credential sharing	
	others	

-403 forbidden : check secret-key or timestamp, it might be outdated or incorrect

-500 internal server error : port issue (get rid of port 25004)

-415 Unsupported Media type : check Content-type in headers of postman, user might be entering in other format of body

-'No mapping rule mapped' 1.change v2 to v1 or vice versa
2.check Content-type is right or not.

-Usually what happens is ,a single receiver have a daily limit of the amount of money he can receive per day

Per day limit for a partner to transfer the amount of money in PayOut is 10Lakh, (also 2L IMPS, 10L NEFT, 10L RTGS).

He can divide this 10Lakh to multiple receivers

But a single receiver also has a limit on the amount of money he can receive.

For DMT a person has a limit of 50k per month.

Number of transactions limit for payout for the partner is 1000 transactions

//

-Kyc fail : Person is not doing the daily ekyc with the same aadhar and pid as he had registered with biometric ekyc

-Agent not allowed in kyc is due to, his aeaps gateway is not activated

Because fino pipe is off and they are not using daily ekyc as of now

In AePs no need to create a customer first, directly pass hi mobile number as customer id

To use Fino, person only have to do biometric ekyc

To use Fingpay, person has to hit all 3 apis of ekyc

--> (Gateway) Please try connecting after sometime

Activate the service (43) for partner and merchant

-->MerchatId incorrect or incorrect pin

Do ekyc or daily kyc

-->Also, Authentication fail in start of gateway, Ans) Activate the service of AePs service code 43

→Get aeaps transactions with ekoTid

SELECT ae.ekoTrxnId, ae.CREATED_AT, al.request, al.response

FROM api_log AS al

JOIN aepstrxndetail AS ae ON al.eko_trxn_id = ae.ekoTrxnId

WHERE ae.userCode = '33178108'

AND ae.ekoTrxnId IN (

3125033732, 3125026807, 3125017054, 3125015766, 3125015137, 3125011913,
3125010533, 3125008517, 3125006602, 3124992754, 3124991975, 3124990412,
3124988032, 3124987566, 3124987090, 3124705866

)

ORDER BY ae.ekoTrxnId DESC\G

-->If person is partner then his serviceprovider id in eko should not be equal 1 or 11

--> Something has gone wrong

Some parameter might be missing.(one partner was not passing service_code)

-->Dmt onboarding of end customer is require

--> Aeaps onboarding of end customer is not required

In gateway call back connection could be due to ssl certificate issue
